Remove Windows 10 Notification icon.

When you click this icon, a dialog will appear which will determine if your PC is Windows 10 ready, if you're eligible to upgrade for free and, of course, regale you with all the wonderful things Windows 10 will mean to you.

Removing KB3035583

To remove KB3035583, first open Windows Update and click "Installed Updates" in the bottomleft corner.

To quickly find KB3035583, you can sort by name. Once you've located it, right-click and choose "Uninstall".

When you select to uninstall this update, you'll be asked to confirm and then you will need to restart your computer.

Microsoft Windows				
You must restart your computer to apply these changes				
Before restarting, save any open files and close all programs.				
Restart Now Restart Later				

Once your computer restarts, the "GWX.exe" and its associated "GWXUX.exe" applications will be removed and the system tray icon and resulting dialog will go away permanently.

If the Icon Returns

Some readers have noted that KB3035583 returns if you don't hide it. If you have Windows updates set to download and install automatically, this means that if you uninstall this update, it will be reinstalled automatically a few days later.

To hide the KB3035583 update and prevent it from being reinstalled, right-click on it in the Windows Update application and select "Hide update".
